

FOUNTAIN VALLEY REGIONAL HOSPITAL BARGAINING UPDATE

MARCH 23, 2017

TENET SUBMITS WAGE PROPOSAL BUT IT'S NO GOOD

Management proposed a wage grid, but it's **unlikely that any worker would actually receive the proposed rates.**

Management wants a "cap," meaning workers would only get a **maximum 2.25 percent increase**, and a measly 2 percent minimum increase.

If you're already above the scale, you only get a 2 percent bonus — **no wage increase!** And if you're a per-diem worker, you only get a 2 percent increase.

THIS IS NOT ENOUGH.

"Management never even responded to our benefit proposal. We have worse coverage at greater costs than any other Tenet employees. Their wage proposal would mean some of us wouldn't reach the scale rate for years. We spent nearly all day waiting for them to present their proposal, and what they gave us was extremely disappointing."
