

Management Continues to Delay

At bargaining on Monday April 14th management failed yet again to bring an economic proposal to present to our bargaining team. Our bargaining team has already presented a complete package of economic and non economic proposals to management months ago and have since been waiting for management.

Management's delays are unacceptable. Delays are a disrespectful waste of our time. It is time for management to get serious and get to business. We are ready to bargain.

“We made it clear to management that if they continue their delays we will have no choice but to escalate our actions”
