

HELP OUR HOUSEKEEPERS!

For months, our housekeepers have been telling management that the chemical cleaning agent they are required to use is making them sick.

But management has refused to take action even though an independent study has shown that cleaning chemicals used at our hospital have caused many people to suffer from burning eyes, rashes, nasal problems and asthma-like symptoms.

Now our EVS Housekeepers and several allies are holding a rally Monday, June 18 at 4 p.m. outside the hospital.

COME OUTSIDE AND JOIN THEM!
WHEN WE STICK TOGETHER, WE WIN TOGETHER.

After the rally, they will file a formal demand to bring the matter to arbitration to get the hospital to switch to a less toxic cleaner.
