

# **WE STOOD UP FOR OURSELVES, AND THEY BACKED DOWN!**

Management didn't know what they were in for when they eliminated our ability to use the "do not schedule" option on Kronos. This option had allowed us to take time off unpaid from work.

Ambulatory Union Stewards filed a class action grievance.

One day after we met with HR and management to voice our opposition, they restored the "do not schedule" code in Kronos for all workers.

This an important victory. It should be a reminder to all us that together, we have the power to protect our benefits and demand a strong voice in our workplace.

If you see management implement any other negative changes, please alert the Union Steward in your department.
