

WE DID IT!

Despite RadNet wasting hundreds of thousands of dollars on an anti-union campaign, 7 out of 11 of facilities/departments voted YES to join the National Union of Healthcare Workers. We are excited to have taken the first step in making improvements for our families and patients. We aim to make all of our outpatient imaging sites places that truly reflect the compassion we feel for our patients and each other.

We expect that RadNet management will try to stifle our voices and refuse to recognize our union by filing objections to our election and other legal delays. We urge them to respect our decision and put valuable patient care dollars to working with us not against us towards what should be our shared vision of making RadNet the best place to give and receive care.

We are Anaheim Advanced Imaging, Garden Grove Advanced Imaging, La Mirada Imaging, Orange Advanced Imaging, West Coast – South Coast, West Coast Radiology – Irvine and West Coast Radiology – Santa Ana.

We join two other RadNet facilities – San Fernando Valley Advanced Imaging and San Fernando Interventional Radiology – in the fight to improve wages and benefits, staffing and workload and gain the respect we all deserve.

We will keep everyone posted on our next steps. Congratulations to all of us!
