

# UNITED FOR A FAIR CONTRACT WITH NO TAKEAWAYS!

How do you know when 65 Imaging Technologists have staged a successful informational picket? When attendance tops out at more than 125 caregivers represented by multiple unions all marching in solidarity.

We sent a powerful message to management Wednesday when our coworkers represented by the California Nurses Association, Teamsters and Stationary Engineers, Local 39 all came out against the hospital's demand for takeaways in ongoing contract negotiations. Picketers were out in force starting at 6 a.m. and kept marching into the evening.

**Marin General reported a \$17 million profit last year. Management has no excuse to eliminate an affordable PPO health insurance option, while offering raises that wouldn't even keep up with the cost of living.**

Workers are united in demanding fair contracts with no takeaways. If management doesn't get the message, we will consider striking with members of at least one allied union early next year.

"I was proud to see so many of my coworkers, represented by different unions, standing up together for what's right. It's wrong for Marin General to cut health benefits while it's reaping millions in profits, and we're not going to let them get away with it."

*Jenn Raven, CT Technologist*

## NEXT BARGAINING SESSION

**Thursday, January 10  
5 p.m.  
MGH Library**
