

# JOIN OUR PICKET LINE ON FRIDAY, FEBRUARY 1!

## WORKERS UNITED WILL NEVER BE DEFEATED

**On Friday, February 1, we will be striking alongside Local 39 Operating Engineers over Marin General's demand that we accept massive healthcare takeaways while the hospital is raking in profits.**

**The North Bay Central Labor Council has sanctioned our strike. We ask that you honor our picket line. Together, we will send a powerful message to management that workers are united against management's greed.**

**Marin General reported a \$17 million profit last year. Its CEO Lee Domanico makes over \$1 million per year.**

**But hospital management wants us to pay hundreds of dollars more per month for our health insurance, without offering raises to help offset the cost. Management is starting with us – imaging technicians – and the engineers because our contracts have expired, but they plan to demand the same concessions from our nurses and our coworkers represented by the Teamsters.**

**Workers at Marin General are standing together to protect our health insurance. Please stand with us.**
