

OUR PLAN TO WIN

Most of us have signed the petition calling on management to meet with us to bargain over shortstaffing, wages, working conditions, and consistency in policy implementation.

It doesn't stop here! We need to work together, as a united force, to achieve our vision of improving staffing, receiving the appropriate compensation, and working in a safe environment, not only for ourselves, but the patients we care for.

Our next steps:

- 1. Turning in the petition**
- 2. Bargaining with management**

This fight will require that all of us confront management as a union in order to win.

We already did this when we fought for our union contract and went on strike. The result: we won!

Now is the moment to fight again so we no longer work shortstaffed, for insufficient wages, and risking our well-being.

United we are strong! United we have power! United we can win!
