OUR BARGAINING PLATFORM

The bargaining platform below was developed based on our responses to the bargaining survey. If approved by a membership vote, these bargaining goals will be developed into formal proposals by the bargaining team and presented to Administration as our priorities for negotiations:

- Maintain all rights and protections from our previous contract
- Fair and reasonable pay increases for all employees
- Safer, more manageable staffing levels to ensure quality patient care
- Improve overall healthcare benefits
- Improved workplace safety
- Better job security protections

OUR BARGAINING TEAM

Our bargaining is made up of the coworkers who will represent us at the bargaining table. There is no limit to the number of bargaining team members. All those who earn more YES than NO votes will be elected to the bargaining team.
