# **Independent Auditors' Report**

The Boards of Directors Kaiser Foundation Health Plan, Inc. and Kaiser Foundation Hospitals:

We have audited the accompanying combined financial statements of Kaiser Foundation Health Plan, Inc. and Subsidiaries (Health Plans) and Kaiser Foundation Hospitals and Subsidiaries (Hospitals), which comprise the combined balance sheets as of December 31, 2014 and 2013, and the related combined statements of operations and changes in net worth, and cash flows for the years then ended, and the related notes to the combined financial statements.

# Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these combined financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of combined financial statements that are free from material misstatement, whether due to fraud or error.

# Auditors' Responsibility

Our responsibility is to express an opinion on these combined financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the combined financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the combined financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the combined financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the combined financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the combined financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion**

In our opinion, the combined financial statements referred to above present fairly in all material respects, the combined financial position of Health Plans and Hospitals as of December 31, 2014 and 2013, and the results of their operations and their cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Notes to Combined Financial Statements

December 31, 2014 and 2013

#### (1) **Description of Business**

The accompanying combined financial statements include Kaiser Foundation Health Plan, Inc. and Subsidiaries (Health Plans) and Kaiser Foundation Hospitals and Subsidiaries (Hospitals). Health Plans and Hospitals are primarily not-for-profit corporations whose capital is available for charitable, educational, research, and related purposes. Health Plans are primarily health maintenance organizations and are generally exempt from federal and state income taxes. Membership at December 31, 2014 and 2013 was 9.6 million and 9.1 million, respectively. At both December 31, 2014 and 2013, the percentage of enrolled membership in California was approximately 78%. The principal operating subsidiary of Kaiser Foundation Hospitals is Kaiser Hospital Asset Management, Inc. (KHAM). The principal operating subsidiaries of Kaiser Foundation Health Plan, Inc.) are:

Kaiser Foundation Health Plan of Colorado Kaiser Foundation Health Plan of Georgia, Inc. Kaiser Foundation Health Plan of the Mid-Atlantic States, Inc. Kaiser Foundation Health Plan of the Northwest Kaiser Health Plan Asset Management, Inc. (KHPAM)

In 2013, Health Plan, Inc. and HealthSpan Partners, an unrelated not-for-profit Ohio-based health system, entered into a definitive agreement to transfer the sole corporate membership of Kaiser Foundation Health Plan of Ohio (Ohio) to HealthSpan Partners. On October 1, 2013, the member substitution transaction was completed. Fair value of the proceeds from this transfer was not material. For the years ended December 31, 2014 and 2013, the results of Ohio operations, including operating revenues of \$7 million and \$382 million, respectively, have been reclassified to discontinued operations.

Independent Medical Groups (Medical Groups) cooperate with Health Plans and Hospitals in conducting the Kaiser Permanente Medical Care Program. Health Plans contracts with Hospitals and the Medical Groups to provide or arrange hospital and medical services for members. Hospitals also contracts with the Medical Groups for certain professional services. Contract payments to the Medical Groups represent a substantial portion of the expenses for medical services reported in these combined financial statements. Payments from Health Plans and Hospitals constitute substantially all of the revenues for the Medical Groups. Because the Medical Groups are independent and not controlled by Health Plans and Hospitals, their financial statements are not combined or consolidated with Health Plans and Hospitals.

At both December 31, 2014 and 2013, the percentages of Health Plans' and Hospitals' total labor force covered under collective bargaining agreements were approximately 69%. At December 31, 2014, approximately 19% of the workforce was covered under collective bargaining agreements that are scheduled to expire within one year (including temporary extensions for certain agreements). At December 31, 2014, approximately 12% of the workforce was working under an expired agreement. In January 2015, a new contract was ratified for 9% of the workforce, reducing to 3% the workforce working under an expired agreement.

Notes to Combined Financial Statements

December 31, 2014 and 2013

Health Plans and Hospitals strive to improve the health and welfare of the communities they serve through their Direct Community Benefit Investment (DCBI) programs. DCBI expenditures provide funding for community benefit programs that serve communities through research, community-based health partnerships, direct health coverage for low-income families, and collaboration with community clinics, health departments, and public hospitals.

For the year ended December 31, 2014, DCBI expenditures (at cost, net of approximately \$1.4 billion of DCBI related revenue) were \$2.2 billion, representing 3.9% of operating revenue. In comparison, for the year ended December 31, 2013, DCBI expenditures (at cost, net of \$1.1 billion of DCBI related revenue) were \$2.0 billion, representing 3.7% of operating revenue. The calculation of DCBI expenditures is based on Health Plans' and Hospitals' direct and indirect costs and the services provided by Health Plans and Hospitals under DCBI programs.

### (2) Summary of Significant Accounting Policies

#### (a) Basis of Presentation

The financial statements of Health Plans and Hospitals are presented on a combined basis due to the operational interdependence of these organizations and because their governing boards and management are substantially the same. These combined financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). All material intercompany balances and transactions have been eliminated. Management has evaluated subsequent events through February 13, 2015, which is the date that these combined financial statements were issued.

### (b) Cash and Cash Equivalents

Cash and cash equivalents include interest-bearing deposits purchased with an original or remaining maturity of three months or less. Cash and investments that are restricted per contractual or regulatory requirements are classified as noncurrent investments and excluded from cash and cash equivalents.

#### (c) Investments

Investments include equity, U.S. Treasury, government agencies, money market funds, and other marketable debt securities and are reported at fair value. Investments are categorized as current assets if they are intended to be available to satisfy current liabilities. Alternative investments are reported under the equity method. Certain investments are illiquid and are valued based on the most current information available. Other-than-temporary impairment and recognized gains and losses, which are recorded on the specific identification basis, and interest, dividend income, and income from equity method alternative investments are included in investment income - net. Health Plans and Hospitals have designated a portion of their investments for the physicians' retirement plan liability related to defined retirement benefits provided for physicians associated with certain Medical Groups. These investments are unrestricted assets of Health Plans and Hospitals. A portion of investment income that

Notes to Combined Financial Statements

December 31, 2014 and 2013

represents the expected return on the investments designated for the physicians' retirement plan has been recorded as a reduction in the provision for physicians' retirement plan benefits and is excluded from investment income - net, as described in the *Physicians' Retirement Plan* note.

Investments are regularly reviewed for impairment and a charge is recognized when the fair value is below cost basis and is judged to be other-than-temporary. In its review of assets for impairment that is deemed other-than-temporary, management generally follows the following guidelines:

- Substantially all investments are managed by outside investment managers who do not need Health Plans' or Hospitals' management preapproval for sales; therefore, substantially all declines in value below cost are recognized as impairment that is other-than-temporary.
- For other securities, losses are recognized for known matters, such as bankruptcies, regardless of ownership period, and investments that have been continuously below book value for an extended period of time are evaluated for impairment that is other-than-temporary.

All other unrealized losses and all unrealized gains on investments are included as other changes in net worth.

Interest income is calculated under the effective interest method and included in investment income - net. Dividends are included in investment income - net on the ex-dividend date, which immediately follows the record date.

Health Plans' and Hospitals' investment transactions are recorded on a trade date basis.

Health Plans enters into purchase and sale To Be Announced (TBA) commitments of mortgage-backed securities within certain fixed-income investment portfolios, which are considered securities in themselves. Health Plans enters into transactions to sell TBA purchase commitments to third parties at current fair values and concurrently acquires other purchase commitments for similar securities at later dates. Open TBA sale commitments represent a liability as Health Plans is obligated to deliver securities on contractual settlement dates. TBA commitments are marked to fair value on a recurring basis. The changes in the fair value of TBA commitments are included in changes in net worth.

# (d) Securities Lending Collateral and Payable

Health Plans and Hospitals enter into securities lending agreements whereby certain securities from their portfolios are loaned to other institutions. Securities lent under such agreements remain in the portfolios of Health Plans and Hospitals. Health Plans and Hospitals receive a fee from the borrower under these agreements, which is recognized ratably over the period that the securities are lent. Collateral, primarily cash, is required at a rate of 102% of the fair value of securities lent and is carried as securities lending collateral. The obligation of Health Plans and Hospitals to return the cash collateral is carried as securities lending payable. The fair value of securities lending collateral is

Notes to Combined Financial Statements

December 31, 2014 and 2013

determined using level 1 or 2 inputs as appropriate, as defined in the *Fair Value Estimates* note. The fair value of the loaned securities is monitored on a daily basis, with additional collateral obtained or refunded as the fair value of the loaned securities fluctuates.

### (e) Broker Receivables and Payables

Broker receivables and payables represent current amounts for unsettled securities sales or purchases.

# (f) Inventory

Inventories, consisting primarily of pharmaceuticals and supplies, are carried at the lower of cost (generally first-in, first-out or weighted average price) or market.

# (g) Land, Buildings, Equipment, and Software

Land, buildings, equipment, and software are stated at cost less accumulated depreciation and amortization. Interest is capitalized on facilities construction and internally developed software work in progress and is added to the cost of the underlying asset. Software, which includes internal and external costs incurred in developing or obtaining computer software for internal use, is capitalized. Qualifying costs incurred during the application development stage are capitalized. Depreciation and amortization begin when the project is substantially complete and ready for its intended use. Software is amortized on a straight-line basis over the estimated useful lives generally ranging from 3 to 7 years. Buildings and equipment are depreciated on a straight-line basis over the estimated useful lives of the various classes of assets, generally ranging from 3 to 33 years.

Management evaluates alternatives for delivering services that may affect the current and future utilization of existing and planned assets and could result in an adjustment to the carrying values or remaining lives of such land, buildings, equipment, and software in the future. Management evaluates and records impairment losses or adjusts remaining lives, where applicable, based on expected utilization, projected cash flows, and recoverable values.

Maintenance and repairs are expensed as incurred. Major improvements that increase the estimated useful life of an asset are capitalized. Upon the sale or retirement of assets, recorded cost and related accumulated depreciation are removed from the accounts, and any gain or loss on disposal is reflected in operations.

Management estimates the fair value of asset retirement obligations that are conditional on a future event if the amount can be reasonably estimated. Estimates are developed through the identification of applicable legal requirements, identification of specific conditions requiring incremental cost at time of asset disposal, estimation of costs to remediate conditions, and estimation of remaining useful lives or date of asset disposal.

Notes to Combined Financial Statements

December 31, 2014 and 2013

# (h) Medical Claims Payable

The cost of health care services is recognized in the period in which services are provided. Medical claims payable consists of unpaid health care expenses to third party providers, which include an estimate of the cost of services provided to Health Plans' members by the third party providers that have been incurred but not reported. The estimate for incurred but not reported claims is based on actuarial projections of costs using historical paid claims and other relevant data. Estimates are monitored and reviewed and, as settlements are made or estimates are revised, adjustments are reflected in current operations. Such estimates are subject to the impact of changes in the regulatory environment and economic conditions, actual utilization of medical services, changes in membership and product mix, claim submission and processing patterns, and other relevant factors. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided. While the ultimate amount of paid claims is dependent on future developments, management is of the opinion that the reserves for claims are adequate to cover such claims.

Health Plans and Hospitals record anticipated reinsurance recoveries for high cost claims eligible for reimbursement under the Patient Protection and Affordable Care Act (PPACA) as described in *The PPACA Reinsurance, Risk Adjustment, and Risk Corridors Programs* note. The amount recorded is an estimate as the ultimate adjudication of these claims will be conducted by the government, and the percentage of claims amounts eligible for reimbursement is permitted to vary from as much as 100% of the claims' value to some lesser amount, as determined.

### (i) Due to Associated Medical Groups

Due to associated medical groups consists primarily of unpaid medical expenses owed to the Medical Groups for medical services provided to members under medical services agreements with Health Plans. The cost of medical services is recognized by Health Plans in the period in which services are provided and is reflected as a component of medical and hospital services expenses.

### (j) Self-Insured Risks

Costs associated with self-insured risks, primarily for professional, general, and workers' compensation liabilities, are charged to operations based upon actual and estimated claims. The portion estimated to be paid during the next year is included in current liabilities. The estimate for incurred but not reported self-insured claims is based on actuarial projections of costs using historical claims and other relevant data. Estimates are monitored and reviewed and, as settlements are made or estimates are revised, adjustments are reflected in current operations. Given the inherent variability of such estimates, the actual liability could differ significantly from the amounts provided. While the ultimate payments for self-insured claims are dependent on future developments, management is of the opinion that the reserve for self-insured risks is adequate. Insurance coverage, in excess of the per occurrence self-insured retention, has been secured with insurers or reinsurers for specified amounts for professional, general, and workers' compensation liabilities. Decisions relating to the limit and scope of the self-insured layer and the amounts of excess insurance purchased are reviewed each year,

Notes to Combined Financial Statements

December 31, 2014 and 2013

subject to management's analysis of actuarial loss projections and the price and availability of acceptable commercial insurance.

# (k) Premium Deficiency Reserves

Premium deficiency reserves and the related expense are recognized when it is probable that expected future health care and maintenance costs under a group of existing contracts will exceed anticipated future premiums and reinsurance recoveries over the contract period. If applicable, premium deficiency reserves extending beyond one year are shown as a long-term liability. Expected investment income and interest expense are included in the calculation of premium deficiency reserves, as appropriate. The level at which contracts are grouped for evaluation purposes is generally by geographic region. The methods for making such estimates and for establishing the resulting reserves are reviewed and updated, and any resulting adjustments are reflected in current operations. At December 31, 2014 and 2013, premium deficiency reserves were \$87 million and \$22 million, respectively. Given the inherent variability of such estimates, the actual liability could differ significantly from the calculated amount.

# (*l*) Derivative Financial Instruments

Derivative financial instruments are utilized primarily to manage the interest costs and the risk associated with changing interest rates. Health Plans and Hospitals enter into interest rate swaps with investment or commercial banks with significant experience with such instruments. In addition, certain investments include derivative products. The changes in the fair value of these derivative instruments are included in investment income - net and settlement costs are recorded as interest expense or investment income - net.

Derivative financial instruments are also utilized to manage the risk of holding equity investments, primarily to hedge downside volatility risk. Heath Plans and Hospitals enter into derivatives such as put-spread collars with similar investment or commercial banks noted above. The changes in fair value for these derivatives are included in investment income - net.

Derivative financial instruments are utilized by Health Plans' and Hospitals' investment portfolio managers. These instruments include futures, forwards, options, and swaps. The changes in fair value for these derivative financial instruments are included in investment income - net.

### (m) Revenue Recognition

Members' dues revenue includes premiums from employer groups and individuals. Members' dues revenue is recognized over the period in which the members are entitled to health care services.

Health Plans estimates accrued retrospective premium adjustments for certain group health insurance contracts based on claims experience and the provisions of the contract. Health Plans records accrued retrospective premiums as an adjustment to members' dues. For the years ended December 31, 2014 and 2013, the amount of premiums written by Health Plans subject to the retrospective rating feature

Notes to Combined Financial Statements

December 31, 2014 and 2013

were \$234 million and \$155 million, respectively. During 2014 and 2013, revenue derived under these contracts was 0.6% and 0.4%, respectively, of total members' dues. During 2014 and 2013, retrospective dues adjustments were \$(16.0) million and \$0.8 million, respectively.

Health Plans participates in certain group contracts, which include provisions for risk adjustment of dues premiums, based on comparative data provided by Health Plans as well as other health plan vendors participating in these same arrangements. Settlements are typically calculated and paid according to the contract provisions and final settlements are made after the group contract term. For the years ended December 31, 2014 and 2013, dues subject to these private risk adjustment arrangements comprise approximately 9% and 2%, respectively, of total dues premiums. For the years ended December 31, 2014 and 2013, \$9 million and \$4 million, respectively, have been recorded as reductions to revenue for these private risk adjustment arrangements.

The majority of Health Plans' and Hospitals' Medicare revenue is received from the Medicare Advantage Program (Part C). Revenues for Part C include capitated payments, which vary based on health status, demographic status, and other factors. Medicare revenues also include accruals for estimates resulting from changes in health risk factor scores. Such accruals are recognized when the amounts become determinable and collection is reasonably assured. Part C revenue is finalized after all data is submitted to Medicare and the final settlement is made after the end of the year.

In addition, Medicare benefits include a voluntary prescription drug benefit (Part D). Revenues for Part D include capitated payments made from Medicare adjusted for health risk factor scores. Revenues also include amounts to reflect a portion of the health care costs for low-income Medicare beneficiaries and a risk-sharing arrangement to limit the exposure to unexpected expenses. Related accruals are recognized monthly based on cumulative experience and membership data. Part D revenue is finalized after all data is submitted to Medicare and the final settlement is made after the end of the year.

Medicare Part C and D revenue is subject to governmental audits and potential payment adjustments. The Centers for Medicare & Medicaid Services (CMS) performs coding audits to validate the supporting documentation maintained by Health Plans and its care providers.

Certain Medicare revenues are paid under cost reimbursement plans based on pre-established rates, and the final settlement is made after the end of the year. Estimates of final settlements of the cost reports are recorded by the Health Plans in current operations.

Estimates of retrospective adjustments resulting from coding audits, cost reports, and other contractual adjustments are recorded in the time period in which members are entitled to health care services. Actual retrospective adjustments may differ from initial estimates.

Premiums collected in advance are deferred and recorded as dues collected in advance or Medicare payments received in advance. Revenue is adjusted to reflect estimates of collectability, including retrospective membership adjustment trends and economic conditions. Revenue and related

Notes to Combined Financial Statements

December 31, 2014 and 2013

receivables are exclusive of charity care. A portion of revenues derived under contracts with the United States Office of Personnel Management is subject to audit and potential retrospective adjustments.

In July 2014, conflicting federal judicial opinions were issued in two jurisdictions regarding the issue of whether or not individuals enrolled in the federal exchange are eligible for subsidies under the PPACA. A panel of the U.S. Court of Appeals of the District of Columbia ruled that the PPACA only provides for premium subsidies for enrollees on state exchanges. A panel of the U.S. Court of Appeals for the Fourth Circuit ruled oppositely that such subsidies are consistent with PPACA language. Resolution of this legal matter is, therefore, pending. For the year ended December 31, 2014, Health Plans had recorded \$60 million in PPACA subsidies related to individuals enrolled on the federal exchange.

Patient services revenue is included in copays, deductibles, fees, and other revenue in the statement of operations and is recognized as services are rendered. Bad debt expense related to patient services revenue is calculated based on historical bad debt experience and recorded as an offset to patient services revenue (net of contractual allowances, charity care, and discounts).

Health Plans provides coverage to certain Medicaid members through capitated contracts with third parties. For the years ended December 31, 2014 and 2013, revenues related to these arrangements were \$730 million and \$389 million, respectively.

### (n) Pension and Other Postretirement Benefits

Health Plans' and Hospitals' defined benefit pension and other postretirement benefit plans are actuarially evaluated and involve various assumptions. Critical assumptions include the discount rate and the expected rate of return on plan assets, and the rate of increase for health care costs (for postretirement benefit plans other than pension), which are important elements of expense and/or liability measurement. Other assumptions involve demographic factors such as retirement age, mortality, turnover, and the rate of compensation increases. Health Plans and Hospitals evaluate assumptions annually, or when significant plan amendments occur, and modify them as appropriate. Pension and other postretirement costs are allocated over the service period of the employees in the plans.

Health Plans and Hospitals use a discount rate to determine the present value of the future benefit obligations. The discount rate is established based on rates available for high-quality fixed-income debt securities at the measurement date whose maturity dates match the expected cash flows of the retirement plans.

Differences between actual and expected plan experience and changes in actuarial assumptions, in excess of a 10% corridor around the larger of plan assets or plan liabilities, are recognized into benefits expense over the expected average future service of active participants. Prior service costs and credits

Notes to Combined Financial Statements

December 31, 2014 and 2013

arise from plan amendments and are amortized into postretirement benefits expense over the expected average future service to full eligibility of active participants.

### (o) Donations and Grants Made or Received

Donations and grants made are recognized at fair value in the period in which a commitment is made, provided the payment of the donation or grant is probable and the amount is determinable. Donations or grants received, including research grants, are recognized at fair value in the period the donation or grant was committed unconditionally by the grantor or in the period the donation or grant requirements are met, if later.

# (p) Use of Estimates

The preparation of these combined financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts. Allowance for uncollectible accounts receivable; estimated fair value of investments; Medicare revenue accruals; Medicare reserves; incurred but not reported medical claims payable; physicians' retirement plan liabilities; pension and other retirement liabilities; premium deficiency reserves; self-insured professional liabilities; self-insured general and workers' compensation liabilities; land, buildings, equipment, and software impairment and useful lives; investment impairment; and amounts accrued related to the PPACA Reinsurance Program represent significant estimates. Actual results could differ materially from those estimates. With respect to employee benefit plans, as occurs from time to time, negotiations with labor partners may result in changes to compensation and benefits. These changes are reflected in the financial statements as appropriate when agreements are finalized.

# (q) The PPACA Reinsurance, Risk Adjustment, and Risk Corridors Programs

The PPACA includes three programs designed to mitigate health plan risk. Two are temporary and one is permanent.

The Reinsurance Program provides for partial reimbursement of certain high cost claims for nongrandfathered individual members, beginning in 2014 and continuing through 2016. As described in the *Medical Claims Payable* note, certain amounts have been recorded in 2014 as expected claims reimbursements under this program. Regulations provide that claims for 2014 will be submitted beginning in 2014 and continuing through April 2015. For the year ended December 31, 2014, Health Plans has recorded \$228 million for estimated recoveries from the Reinsurance Program and Reinsurance fees of \$464 million.

Notes to Combined Financial Statements

December 31, 2014 and 2013

The Risk Adjustment Program is permanent, and provides for retrospective adjustment of revenue for non-grandfathered individual and small group market plans, whether inside or outside PPACA exchanges. All participating insurers will begin submitting data on risk indicators for these populations by April 2015 and will subsequently be notified in 2015 of any revenue adjustments related to 2014 business. The Risk Adjustment Program is designed such that payments to plans with higher relative risk are funded by transfers from plans with lower relative risk. Management cannot reasonably estimate adjustments related to this program, absent information on the risk factors of competitors' enrolled non-grandfathered individual and small group market plans and, accordingly, no adjustments to revenue have been recorded for the year ended December 31, 2014.

The Risk Corridors Program is temporary for the years 2014 - 2016. This program provides for gains and losses on the individual and small group market plans to be shared with the government. The Risk Corridors Program calculation is scheduled to be submitted to the government in conjunction with the Medical Loss Ratio filings in 2015, for 2014 business, as required by the PPACA. Revenue adjustments and claims expense adjustments relating to the Risk Adjustment Program and the Reinsurance Program are necessary to perform this calculation for 2014 business. Therefore, management has recorded no revenue adjustment amounts related to the Risk Corridors Program for the year ended December 31, 2014.

### (r) Recently Issued Accounting Standards

During 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-06 *Other Expenses (Topic 720) Fees Paid to the Federal Government by Health Insurers* (a consensus of the FASB Emerging Issues Task Force). This guidance was adopted by Health Plans and Hospitals in 2014. This accounting standard is applicable to the Health Insurance Providers (HIP) fee provided for in the PPACA. The Internal Revenue Service (IRS) has provided Health Plans its final assessment of \$359 million for 2014, and the amount was paid and expensed in 2014. Management has estimated the 2015 assessment on Health Plans to be approximately \$500 million, which will be expensed throughout 2015. The IRS assessment will be based on the agency's calculation of Health Plans' net premiums in 2014 as a percentage of total premiums for all U.S. health plans.

During 2013, the FASB issued ASU No. 2013-06 *Not-for-Profit Entities (Topic 958) Services Received from Personnel of an Affiliate* (a consensus of the FASB Emerging Issues Task Force). This guidance will be adopted by Health Plans and Hospitals in 2015. Management has evaluated this accounting standard and does not expect it to have a significant effect on the combined financial statements.

In May 2014, the FASB issued ASU No. 2014-09 *Revenue from Contracts with Customers*. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for Health Plans and Hospitals on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. Management is evaluating the effect that ASU 2014-09 will have on its combined financial

Notes to Combined Financial Statements

December 31, 2014 and 2013

statements and related disclosures. Management has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

In June 2014, the FASB issued ASU No. 2014-11 *Transfers and Servicing*. The ASU changes the accounting for certain repurchase transactions and requires additional disclosures for repurchase agreements, securities lending transactions and repurchase to maturity transactions that are accounted for as secured borrowings, and certain transfers of financial assets accounted for as a sale. The new standard is effective for Health Plans and Hospitals on January 1, 2015. Management has evaluated this accounting standard and does not expect it to have a significant effect on the combined financial statements; however, additional disclosures related to securities lending activities will be required.

# (3) Fair Value Estimates

The carrying amounts reported in the balance sheets for cash and cash equivalents, securities lending collateral, broker receivables, accounts receivable - net, accounts payable and accrued expenses, medical claims payable, due to associated medical groups, payroll and related charges, securities lending payable, and broker payables approximate fair value.

Investments, other than alternative investments, as discussed in the *Investments* note, are reported at fair value. The fair values of investments are based on quoted market prices, if available, or estimated using quoted market prices for similar investments. If listed prices or quotes are not available, fair value is based upon other observable inputs or models that primarily use market-based or independently sourced market parameters as inputs. In addition to market information, models also incorporate transaction details such as maturity. Fair value adjustments, including credit, liquidity, and other factors, are included, as appropriate, to arrive at a fair value measurement. Certain investments are illiquid and are valued based on the most current information available, which may be less current than the date of these combined financial statements.

The carrying value of alternative investments, which include absolute return, risk parity, and private equity, is reported under the equity method, which management believes to approximate fair value. The fair values of alternative investments have been estimated by management based on all available data, including information provided by fund managers or the general partners. The underlying securities within absolute return investments are typically valued using quoted prices for identical or similar instruments within active and inactive markets. The underlying holdings within private equity investments are valued based on recent transactions, operating results, and industry and other general market conditions.

Health Plans and Hospitals utilize a three-level valuation hierarchy for fair value measurements. An instrument's categorization within the hierarchy is based upon the lowest level of input that is significant to the fair value measurement. For instruments classified in level 1 of the hierarchy, valuation inputs are quoted prices for identical instruments in active markets at the measurement date. For instruments classified in level 2 of the hierarchy, valuation inputs are directly observable but do not qualify as level 1 inputs. Examples of level 2 inputs include: quoted prices for similar instruments in active markets; quoted prices for identical

Notes to Combined Financial Statements

December 31, 2014 and 2013

or similar instruments in inactive markets; other observable inputs such as interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates; and market-correlated inputs that are derived principally from or corroborated by observable market data. For instruments classified in level 3 of the hierarchy, valuation inputs are unobservable inputs for the instrument. Level 3 inputs incorporate assumptions about the factors that market participants would use in pricing the instrument.

The fair value of long-term debt is based on level 2 inputs for debt with similar risk, terms, and remaining maturities. At December 31, 2014 and 2013, the carrying amount of long-term debt totaled \$7.0 billion and \$7.2 billion, respectively. At both December 31, 2014 and 2013, the estimated fair value of long-term debt was approximately \$7.2 billion.

At December 31, 2014 and 2013, Health Plans and Hospitals held derivative financial instruments including interest rate swaps, as well as futures, swaps, and forwards held within investment portfolios. The estimated fair values of derivative instruments were determined using level 2 inputs, including available market information and valuation methodologies, primarily discounted cash flows. Additional description and the fair value of derivative instruments are contained in the *Derivative Instruments* note.

### (4) Investments

Management's methods for estimating fair value of financial instruments are discussed in the *Fair Value Estimates* note.

Total realized and unrealized year-to-date net gains related to assets held at						
December 31, 2013	\$	4	\$ 	\$ 125 \$	S	129

Transfers between fair value input levels, if any, are recorded at the end of the reporting period. Transfers between fair value input levels occur when valuation inputs used to record or disclose assets or liabilities change from one level of the valuation hierarchy to another. During the years ended December 31, 2014 and 2013, there were no transfers between assets with inputs with quoted prices in active markets for identical assets (level 1) and assets with inputs with significant other observable inputs (level 2).

Noncurrent investments include specific funds held in trust accounts related to collateral requirements for certain reinsurance agreements. At December 31, 2014 and 2013, the values of these funds were \$30 million and \$29 million, respectively.

Absolute return investments use advanced investment strategies, including derivatives, to generate positive long-term risk adjusted returns. Private equity investments consist of funds that make direct investments in private companies. Risk parity funds use risk as the primary factor to allocate investments among asset classes. Management meets with alternative investment fund managers periodically to assess portfolio performance and reporting and exercises oversight over fund managers. At December 31, 2014, Hospitals had original commitments related to alternative investments of \$4.7 billion, of which \$2.3 billion was invested, leaving \$2.4 billion of remaining commitments. At December 31, 2013, Hospitals had original commitments related to alternative investments of \$4.7 billion was invested, leaving \$1.7 billion of remaining commitments.

Notes to Combined Financial Statements

December 31, 2014 and 2013

For the years ended December 31, investment income - net was comprised of the following (in millions):

	 2014	2013
Other-than-temporary impairment Recognized gains Recognized losses Income from equity method alternative investments Interest, dividends, and other income - net Derivative income (loss)	\$ (657) \$ 1,123 (206) 317 709 132	(498) 1,391 (170) 235 562 (8)
Total investment income - net	1,418	1,512
Less investment income included in operating income	 (318)	(355)
Investment income - net	\$ 1,100 \$	1,157

For the years ended December 31, 2014 and 2013, Health Plans and Hospitals recorded impairment of certain investments in accordance with the policy described in the *Summary of Significant Accounting Policies - Investments* note. During 2014 and 2013, there was \$5 million and \$12 million, respectively, of impairment of alternative investments.

Absolute return, risk parity, and private equity investments include redemption restrictions. Absolute return and risk parity investments require 10 to 90 day written notice of intent to withdraw and are often subject to the approval and capital requirements of the fund manager. Absolute return investments of \$410 million are subject to lock-up periods of up to 4 years. Private equity agreements do not include provisions for redemption. Distributions will be received as the underlying investments of the funds are liquidated, which is expected over the next 11 years.

### (5) **Derivative Instruments**

### (a) Interest Rate Swaps

At December 31, 2014 and 2013, Health Plans and Hospitals had 11 agreements to manage interest rate fluctuations (Interest Rate Swaps) with a total notional amount of \$1.2 billion for each period. At December 31, 2014 and 2013, the fair values of these agreements were \$(267) million and \$(160) million, respectively, and were recorded in other long-term liabilities. For the years ended December 31, 2014 and 2013, Health Plans and Hospitals recorded \$35 million and \$36 million in interest expense relating to the Interest Rate Swaps, respectively. For the years ended December 31, 2014 and 2013, net changes in fair values totaled \$(107) million and \$141 million, respectively, and were recorded in investment income - net.

These derivatives contain reciprocal provisions whereby if Health Plans' and Hospitals' or the counterparties' credit rating was to decline to certain levels, provisions would be triggered requiring Health Plans and Hospitals or the counterparties to provide certain collateral. At December 31, 2014

Notes to Combined Financial Statements

December 31, 2014 and 2013

and 2013, no collateral was required to be posted by either Health Plans and Hospitals or the counterparties.

### (b) Derivatives Held in Investment Portfolios

At December 31, 2014 and 2013, Health Plans' and Hospitals' portfolio managers held \$38 million and \$5 million, respectively, of futures, forwards, options, and swaps to attempt to protect investments against volatility. For the years ended December 31, 2014 and 2013, net changes in fair values totaled \$25 million and \$(5) million, respectively, and were recorded in investment income - net. For the years ended December 31, 2014 and 2013, gains (losses) resulting from derivative settlements totaled \$214 million and \$(144) million, respectively, and were recorded in investment income - net.

### (c) Information on Derivative Gain (Loss) and Fair Value

December 31, 2014 and 2013

upgrade, or development of qualifying assets. Capitalized interest is added to the cost of the underlying assets and is depreciated or amortized over the useful lives of the assets. During 2014 and 2013, Health Plans and Hospitals capitalized \$36 million and \$88 million, respectively, of interest in connection with various capital projects.

Asset retirement obligations relate primarily to the following: leased building restoration, building materials containing asbestos, leaded wall shielding, storage tanks (above ground and below ground), chillers or cooling tower chemicals, mercury in large fixed-components, and hard drives requiring data wiping prior to disposal. At December 31, 2014 and 2013, the liability for asset retirement obligations was \$84 million and \$86 million, respectively. During 2014 and 2013, amortization and other adjustments of the associated assets totaled \$18 million and \$11 million, respectively. At December 31, 2014 and 2013, the unamortized asset related to this retirement obligation was \$9 million and \$12 million, respectively.

### (9) Medical Claims Payable

For the years ended December 31, activity in the liability for medical claims payable was as follows (in millions):

	2014	2013
Balances at January 1	\$ 1,260 \$	1,320
Incurred related to: Current year Prior years	 7,453 (83)	7,194 (172)
Total incurred	 7,370	7,022
Paid related to: Current year Prior years	 6,277 960	6,148 934
Total paid	 7,237	7,082
Balances at December 31	\$ 1,393 \$	1,260

Amounts incurred related to prior years vary from previously estimated liabilities as the claims are ultimately adjudicated and paid. Liabilities are reviewed and revised as information regarding actual claims payments becomes known. Negative amounts reported for incurred related to prior years result from claims being adjudicated and paid for amounts less than originally estimated.

Notes to Combined Financial Statements

December 31, 2014 and 2013

### (10) Other Liabilities

At December 31, other current liabilities were as follows (in millions):

	2014	 2013
Self-insured risks \$	376	\$ 400
Dues collected in advance	568	496
Medicare liabilities	37	34
Postretirement benefits	80	122
Physicians' retirement plan liability	155	143
TBA commitments	141	49
Other	402	 364
Total \$	1,759	\$ 1,608

At December 31, other long-term liabilities were as follows (in millions):

	 2014	 2013
Self-insured risks	\$ 1,451	\$ 1,395
Derivatives liability	314	185
Due to associated medical groups	294	282
Other	 331	 295
Total	\$ 2,390	\$ 2,157

# (11) Debt

At December 31, debt was as follows (in millions):

	 2014	 2013
<ul><li>Tax-exempt revenue bonds and taxable bonds and notes:</li><li>0.01% to 3.90% variable rate due through 2052</li><li>3.60% to 5.38% fixed rate due through 2045</li><li>Others at various rates due through 2026</li></ul>	\$ 4,114 3,506 2	\$ 3,991 3,666 2
Total	\$ 7,622	\$ 7,659
Other current debt:		
Commercial paper	\$ 654	\$ 438
Current portion of long-term debt Long-term debt subject to short-term	18	158
remarketing arrangements - net	1,445	1,537
Long-term debt classified as a long-term liability	 5,505	 5,526
Total	\$ 7,622	\$ 7,659

Notes to Combined Financial Statements

December 31, 2014 and 2013

During 2014, Hospitals redeemed \$305 million – net of taxable commercial paper with an original maturity of 90 days or less and \$215 million of fixed-rate bonds using taxable commercial paper proceeds. During 2014, Hospitals also retired \$17 million and \$13 million, respectively, of tax-exempt variable rate debt and fixed-rate bonds. During 2013, Hospitals redeemed \$278 million of fixed-rate bonds and \$60 million of variable-rate bonds using taxable commercial paper proceeds and retired \$18 million of tax-exempt variable rate debt.

At December 31, 2014 and 2013, repurchase of variable rate bonds totaling \$3.4 billion and \$3.5 billion, respectively, may be required at earlier than stated maturity. These bonds may be remarketed rather than repurchased. Health Plans and Hospitals have provided self liquidity for the variable rate demand bonds with put options. Additionally, at both December 31, 2014 and 2013, management had the ability to finance the acquisition of up to \$1.5 billion of any unremarketed bonds that are put, using available credit facilities. At December 31, 2014 and 2013, \$1.4 billion and \$1.5 billion, respectively, of these variable rate demand bonds were classified in current liabilities. These amounts were net of \$1.5 billion of available long-term credit facilities.

At December 31, 2014 and 2013, \$60 million and \$68 million, respectively, of the above tax-exempt fixed-rate revenue bonds represented a net unamortized premium balance.

Scheduled principal payments for each of the next five years and thereafter considering obligations subject to short-term remarketing as due according to their long-term amortization schedule, except as described below, were as follows (in millions):

2015	\$ 672
2016	121
2017	18
2018	18
2019	18
Thereafter	 6,715
Total	\$ 7,562

At December 31, 2014, Hospitals had certain bonds that require mandatory tender by the holder on a date certain as follows: \$205 million in 2016 and \$275 million in 2017. Hospitals intends to remarket these bonds until final maturity of the bonds.

# Credit Facility

Hospitals' credit facility of \$1.5 billion terminates in August 2016. Various interest rate options are available under this facility. Any revolving borrowings mature on the termination date. Hospitals pays facility fees, which range from 0.065% to 0.125% per annum, depending upon Hospitals' long-term senior unsecured debt rating. At December 31, 2014, the facility fee was at an annual rate of 0.08%. At December 31, 2014 and 2013, no amounts were outstanding under this credit facility.

Notes to Combined Financial Statements

December 31, 2014 and 2013

Hospitals' revolving credit facility contains financial covenants. Under the terms of this facility, Hospitals is required to maintain minimum debt service coverage, as defined. Hospitals is also required to maintain a ratio of total debt to capital, as defined.

# Taxable Commercial Paper Program

Hospitals maintains a commercial paper program providing for the issuance of up to \$1.5 billion in aggregate maturity value of short-term indebtedness. The commercial paper is issued in denominations of \$100,000 and will bear such interest rates, if interest-bearing, or will be sold at such discount from their face amounts, as agreed upon by Hospitals and the dealer acting in connection with the commercial paper program. The commercial paper may be issued with varying maturities up to a maximum of 270 days from the date of issuance. At December 31, 2014 and 2013, commercial paper of \$654 million and \$438 million, respectively, was outstanding under this program and are included within other current debt.

# (12) Pension Plans

# (a) Defined Benefit Plan

Health Plans and Hospitals have a defined benefit pension plan (Plan) covering substantially all their employees. Benefits are based on age at retirement, years of credited service, and average compensation for a specified period prior to retirement. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

For financial reporting purposes, the projected unit credit method is used. At December 31, 2014 and 2013, substantially all pension fund assets were held in a group trust. At December 31, 2014 and 2013, the trust's assets were invested primarily in fixed-income and equity securities, with approximately 18% and 14% of trust assets, net of liabilities, respectively, invested in alternative investments.

Notes to Combined Financial Statements

December 31, 2014 and 2013

At December 31, the funded status of the plan was as follows (in millions):

		2014		2013
Change in projected benefit obligation (PBO): Benefit obligation at beginning of year Service cost Interest cost Special termination benefits Plan amendments Net actuarial loss (gain) Benefits paid	\$	$     \begin{array}{r}       12,964 \\       879 \\       646 \\       - \\       1 \\       2,567 \\       (696)     \end{array} $	\$	$ \begin{array}{r}     13,872 \\     1,046 \\     599 \\     20 \\     \hline     (2,075) \\     (498) \end{array} $
Benefit obligation at end of year	\$	16,361	\$	12,964
Accumulated benefit obligation at end of year	\$	12,453	\$	9,664
Change in Health Plans' and Hospitals' share of trust assets: Fair value of plan assets at beginning of year Actual return on plan assets Contributions Benefits paid	\$	8,503 627 940 (696)	\$	7,329 816 856 (498)
Fair value of plan assets at end of year	\$	9,374	\$	8,503
Funded status	\$	(6,987)	\$	(4,461)
Amounts recognized in the balance sheet consist of: Noncurrent assets Current liabilities Pension and other retirement liabilities	\$	(6,987)	\$	(4,461)
	\$	(6,987)	\$	(4,461)
Amounts recognized in net worth: Net actuarial loss Prior service cost	\$ 	5,381 6 5,387	\$ - \$	3,004 20 3,024
	Ψ	5,507	Ψ	5,024

The measurement date used to determine pension valuations was December 31.

Notes to Combined Financial Statements

December 31, 2014 and 2013

For the years ended December 31, pension expense was as follows (in millions):

	_	2014	2013
Service cost	\$	879 \$	1,046
Interest cost		646	599
Expected return on plan assets		(610)	(553)
Special termination benefits			20
Amortization of net actuarial loss		173	385
Amortization of prior service cost	_	15	15
Net pension expense		1,103	1,512
Other changes in plan assets and PBO recognized			
in net worth:			
Net actuarial loss (gain)		2,550	(2,338)
Prior service cost		1	—
Amortization of net actuarial loss		(173)	(385)
Amortization of prior service cost		(15)	(15)
Total recognized in net worth		2,363	(2,738)
Total recognized in net periodic benefit			
cost and net worth	\$	3,466 \$	(1,226)

During 2015, \$350 million and \$8 million in estimated net actuarial loss and prior service cost, respectively, will be amortized from net worth into net pension expense.

Actuarial assumptions used were as follows:

	2014	2013
Weighted average discount rate at January 1 for calculating pension expense	5.15%	4.35%
Weighted average discount rate for calculating		4.5570
December 31 PBO Weighted average salary scale for calculating pension	4.25%	5.15%
expense and December 31 PBO	4.20%	4.60%
Expected long-term rate of return on plan assets for calculating pension expense	7.25%	7.50%

During 2015, management expects to contribute approximately \$1.0 billion to its pension plan.

Notes to Combined Financial Statements

December 31, 2014 and 2013

The following benefit payments, which reflect expected future service, are expected to be paid (in millions):

2015	\$ 510
2016	564
2017	611
2018	662
2019	708
2020 - 2024	4,029

#### **Explanation of Investment Strategies and Policies**

A total return investment approach is employed for the defined benefit pension plan whereby the plan invests in a mix of equity, fixed-income, and alternative asset classes to maximize the long-term return of plan assets for a prudent level of risk. The intent of this strategy is to minimize plan expenses by outperforming plan liabilities over the long run. Risk tolerance is established through consideration of plan liabilities, plan funded status, and corporate financial condition. The investment portfolio will consist over time of a varying but diversified blend of equity, fixed-income, and alternative investments. Diversification includes such factors as geographic location, equity capitalization size and style, placement in the capital structure, and security type. Investment risk is measured and monitored on an ongoing basis through annual liability measurements, periodic asset/liability studies, and quarterly investment portfolio reviews. The Plan's investment policy has restrictions relating to credit quality, industry/sector concentration, duration, concentration of ownership, and use of derivatives.

#### Capital Market Assumption Methodology

To determine the long-term rate of return assumption for plan assets, management incorporates historical relationships among the various asset classes and subclasses to be accessed over the investment horizon. Management's intent is to maximize portfolio efficiency. This will be accomplished by seeking the highest returns prudently available among the available asset classes. Overall portfolio volatility is managed through diversification among asset classes. Current market factors such as inflation and interest rates are evaluated before long-term capital market assumptions are determined. From time to time, management reviews its long-term investment strategy and reconciles that strategy with the long-term liabilities of the pension plan. This asset-liability study produces a range of expected returns over medium and long-term time periods. Those intermediate and long-term investment projections form the basis for the expected long-term rate of return on assets.

Notes to Combined Financial Statements

December 31, 2014 and 2013

At December 31, 2014, the estimated fair value of total pension trust assets - net by level was as follows (in millions):

		Quoted prices in active markets for identical assets level 1		Significant other observable inputs level 2	ı	Significant mobservable inputs level 3	Total
Assets:

Total liabilities	27	1,964		1,991
Fair value of pension trust assets - net	\$ 7,874 \$	10,409	\$ 2,017 \$	20,300

At December 31, 2013, Health Plans' and Hospitals' share of pension trust assets was 41.9%, or \$8.5 billion. The remaining share of pension trust assets is for Medical Groups and a related party associated with Medical Groups.

Notes to Combined Financial Statements

December 31, 2014 and 2013

For the year ended December 31, 2014, the reconciliation of assets with fair value measurements using significant unobservable inputs (level 3) was as follows (in millions):

	-	Debt securities		Alternative investments		Total
Beginning balance	\$	3	\$	2,014	\$	2,017
Transfers into level 3						
Changes related to actual return on plan assets		_		218		218
Purchases, sales, and settlements - net		(3)		871		868
	<del>-</del>	(5)	 ¢		ф —	
Ending balance	۵ ا		\$	3,103	\$_	3,103
Total year-to-date net gains						
related to assets held at December 31, 2014	\$		\$	218	\$	218

For the year ended December 31, 2013, the reconciliation of assets with fair value measurements using significant unobservable inputs (level 3) was as follows (in millions):

	_	Equity securities		Debt securities	 Alternative investments	 Total
Beginning balance	\$	2	\$	2	\$ 1,340	\$ 1,344
Transfers into level 3		—		—		
Changes related to actual return on plan assets		(1)		—	138	137
Purchases, sales, and settlements - net		(1)		1	 536	 536
Ending balance	\$		\$	3	\$ 2,014	\$ 2,017
Total year-to-date net gains related to assets held			_			
at December 31, 2013	\$		\$		\$ 138	\$ 138

During the years ended December 31, 2014 and 2013, there were no significant transfers of assets with inputs with quoted prices in active markets for identical assets (level 1) and assets with inputs with significant other observable inputs (level 2).

Notes to Combined Financial Statements

December 31, 2014 and 2013

The target asset allocation and expected long-term rate of return on assets (ELTRA) for calculating pension expense were as follows:

	2014 and 2013	2014	2013
	Target Range	ELTRA	ELTRA
Cash and cash equivalents	0%-3%	3.00%	3.00%
Equity securities	43%-55%	8.65%	8.90%
Debt securities	28%-45%	5.50%	4.55%
Alternative investments	10%-25%	7.60%	8.20%
Total	100%	7.25%	7.50%

Alternative investments, which include absolute return, risk parity, and private equity, held in the pension trust are reported at net asset value as a practical expedient for fair value. Absolute return investments use advanced investment strategies, including derivatives, to generate positive long-term risk adjusted returns. Private equity investments consist of funds that make direct investments in private companies. Risk parity funds use risk as the primary factor to allocate investments among asset classes. At December 31, 2014, the trust had original commitments related to alternative investments of \$3.8 billion, of which \$1.5 billion was invested, leaving \$2.3 billion of remaining commitments. At December 31, 2013, the trust had original commitments related to alternative investments of \$2.6 billion, of which \$911 million was invested, leaving \$1.7 billion of remaining commitments.

Absolute return, risk parity, and private equity investments include redemption restrictions. Absolute return and risk parity investments require 10 to 90 day written notice of intent to withdraw and are often subject to the approval and capital requirements of the fund manager. Absolute return investments of \$336 million are subject to lock-up periods of up to 4 years. Private equity agreements do not include provisions for redemption. Distributions will be received as the underlying investments of the funds are liquidated, which is expected over the next 11 years.

# (b) Defined Contribution Plans

Health Plans and Hospitals have defined contribution plans for eligible employees. Employer contributions and costs are typically based on a percentage of covered employees' eligible compensation. During 2014 and 2013, there were no required employee contributions. For the years ended December 31, 2014 and 2013, plan expense, primarily employer contributions, was \$253 million and \$238 million, respectively.

#### (c) Multi-Employer Plans

Health Plans and Hospitals participate in a number of multi-employer defined benefit pension plans under the terms of collective bargaining agreements that cover some union-represented employees. Some risks of participating in these multi-employer plans that differ from single-employer plans include:

Notes to Combined Financial Statements

December 31, 2014 and 2013

- Assets contributed to the multi-employer plan by one employer may be used to provide benefits to employees of other participating employers.
- If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.
- Employers that choose to stop participating in a multi-employer plan may be required to pay the plan an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

Health Plans' and Hospitals' participation in these plans for the annual period ended December 31, 2014 is outlined in the table below. The "EIN/PN" column provides the Employee Identification Number (EIN) and the three-digit plan number (PN), if applicable. Unless otherwise noted, the most recent Pension Protection Act (PPA) zone status available in 2014 and 2013 is for the plan's year-end in 2013 and 2012, respectively. The zone status is based on information that Health Plans and Hospitals obtained from publicly available information provided by the United States Department of Labor. Among other factors, plans in the red zone are generally less than 65% funded, plans in the yellow zone are between 65% and 80% funded, and plans in the green zone are at least 80% funded. The "FIP/RP Status Pending/Implemented" column indicates plans for which a financial improvement plan (FIP) or a rehabilitation plan (RP) is either pending or has been implemented. The "Health Plans' and Hospitals' Contributions to Plan Exceeded More Than 5% of Total Contributions" columns represent those plans where Health Plans and Hospitals were listed in the plans' Forms 5500 as providing more than 5 percent of the total contributions for the plan years listed. The last column lists the expiration dates of the collective bargaining agreements to which the plans are subject. There have been no significant changes that affect the comparability of 2014 and 2013 employer expense.

Notes to Combined Financial Statements

December 31, 2014 and 2013

(2) Includes UFCW Local 555 Pharmacy Techs and Radiologists expiring September 30, 2015 and October 31, 2015, respectively.

(3) Negotiations are in progress for collective bargaining agreements that expired in 2014.

Notes to Combined Financial Statements

December 31, 2014 and 2013

#### (13) Postretirement Benefits Other than Pensions

#### (a) Defined Benefit Plan

Certain employees may become eligible for postretirement health care and life insurance benefits while working for Health Plans and Hospitals. Benefits available to retirees, through both affiliated and unaffiliated provider networks, vary by employee group. Postretirement health care benefits available to retirees include subsidized Medicare premiums, medical and prescription drug benefits, dental benefits, and vision benefits.

In September 2013, Health Plans and Hospitals modified its postretirement health care and life insurance benefit plans for substantially all non-union represented employees. Health Plans and Hospitals will provide premium subsidies and health reimbursement accounts to affected future retirees to help pay for retiree medical costs. This modification has been accounted for as a negative plan amendment and resulted in a reduction in liability for postretirement benefits other than pension of \$1.2 billion. On September 30, 2013, Health Plans' and Hospitals' postretirement health care and life insurance liability was remeasured as a result of this modification, and actuarial assumptions were updated, leading to different assumptions for discount rate and health care trend rates for the nine months ended September 30, 2013 versus the three months ended December 31, 2013.

Notes to Combined Financial Statements

December 31, 2014 and 2013

At December 31, the accrued liability for postretirement benefits was as follows (in millions):

	 2014	 2013
Change in benefit obligation: Benefit obligation at beginning of year Service cost Interest cost Plan amendments Benefits paid or provided Net actuarial loss (gain)	\$ 5,483 156 278 2 (132) 1,406	\$ 7,305 276 308 (1,206) (91) (1,109)
Benefit obligation at end of year	\$ 7,193	\$ 5,483
Change in plan assets: Fair value of plan assets at beginning of year Actual return on plan assets Contributions Benefits paid or provided	\$  532 (132)	\$  91 (91)
Fair value of plan assets at end of year	\$ 400	\$ 
Funded status	\$ (6,793)	\$ (5,483)
Amounts recognized in the balance sheet consist of: Noncurrent assets Current liabilities Pension and other retirement liabilities	\$ 	\$ (122) (5,361)
	\$ (6,793)	\$ (5,483)
Amounts recognized in net worth: Net actuarial loss Prior service credit	\$ 4,078 (2,407)	\$ 2,815 (2,763)
	\$ 1,671	\$ 52

The measurement date used to determine postretirement benefits valuations was December 31.

Notes to Combined Financial Statements

December 31, 2014 and 2013

For the years ended December 31, postretirement benefits expense was as follows (in millions):

		2014	2013
Service cost	\$	156 \$	276
Interest cost		278	308
Expected return on plan assets			—
Amortization of prior service credit		(354)	(250)
Amortization of net actuarial loss		143	199
Postretirement benefits expense	_	223	533
Other changes in plan assets and benefit obligations			
recognized in net worth:			
Prior service cost (credit)		2	(1,206)
Amortization of prior service credit		354	250
Net actuarial loss (gain)		1,406	(1, 109)
Amortization of net actuarial loss	_	(143)	(199)
Total recognized in net worth		1,619	(2,264)
Total recognized in net periodic benefit cost and			
net worth	\$	1,842 \$	(1,731)

During 2015, \$218 million and \$(353) million in estimated net actuarial loss and prior service credit, respectively, will be amortized from net worth into postretirement benefits expense.

During 2014, the employer contributions and benefits paid or provided were \$532 million and \$132 million, respectively. In December 2014, \$400 million was deposited into a retirement benefits trust account to fund the postretirement benefits of certain employees. During 2013, the employer contributions and benefits paid or provided were \$91 million. During 2014 and 2013, there were no participant contributions from active employees.

Actuarial assumptions used were as follows:

	2014	2013
Weighted average discount rate for calculating		
postretirement benefits expense from January 1 to September 30	5.25%	4.60%
Weighted average discount rate for calculating		
postretirement benefits expense from September 30 to December 31	5.25%	5.30%
Weighted average discount rate for calculating		
December 31 accumulated postretirement benefit obligation	4.35%	5.25%

Notes to Combined Financial Statements

December 31, 2014 and 2013

For the nine months ended September 30, 2013, the assumed health care cost trend rates used to determine postretirement benefits expense were as follows:

	Basic medical Pre-65/Post-65	Prescription drug Pre-65/Post-65	Medicare Part D	Dental	Medicare Part A&B	Medicare Part C	Supplemental medical
Initial trend rate - 2013	7.50% / 6.75%	6.50% / 6.50%	6.70%	4.50%	6.25%	4.00%	7.50%
Ultimate trend rate	4.50% / 4.50%	4.50% / 4.50%	4.50%	4.50%	4.50%	4.50%	4.50%
First year at ultimate trend rate	2026 / 2022	2025 / 2025	2025	2013	2020	2026	2026

The following were the assumed health care cost trend rates used to determine the December 31, 2013 benefit obligation and postretirement benefits expense for the three months ended December 31, 2013 and twelve months ended December 31, 2014:

	Basic medical Pre-65/Post-65	Prescription drug Pre-65/Post-65	Medicare Part D	Dental	Medicare Part A&B	Medicare Part C	Supplemental medical Pre-65/Post-65
Initial trend rate - 2013	7.00% / 6.00%	6.00% / 6.00%	-10.00%	4.50%	5.50%	-5.00%	7.00% / 6.00%
Initial trend rate - 2014	7.00% / 6.00%	6.00% / 6.00%	6.00%	4.50%	5.50%	0.75%	7.00% / 6.00%
Ultimate trend rate	4.50% / 4.50%	4.50% / 4.50%	4.50%	4.50%	4.50%	4.50%	4.50% / 4.50%
First year at ultimate trend rate	2026 / 2022	2025 / 2025	2025	2013	2020	2018	2026 / 2022

The following were the assumed health care cost trend rates used to determine the December 31, 2014 benefit obligation:

	Basic medical	Prescription drug	Medicare		Medicare	Medicare	Supplemental medical
	Pre-65/Post-65	Pre-65/Post-65	Part D	Dental	Part A&B	Part C	Pre-65/Post-65
Initial trend rate - 2014	5.50% / 5.25%	9.00% / 9.00%	4.00%	4.50%	5.25%	-2.00%	5.50% / 5.25%
Ultimate trend rate	4.50% / 4.50%	4.50% / 4.50%	4.50%	4.50%	4.50%	4.50%	4.50% / 4.50%
First year at ultimate trend rate	2026 / 2022	2025 / 2025	2026	2014	2022	2018	2026 / 2022

A 1% increase in the health care medical trend rate would increase the benefit obligation by \$1.1 billion and the service cost plus interest by \$75 million. A decrease of 1% in the health care medical trend rate would decrease the benefit obligation by \$898 million and the service cost plus interest by \$57 million.

The following benefit payments, which reflect expected future service, are expected to be paid or provided (in millions):

2015	\$ 151
2016	175
2017	200
2018	226
2019	252
2020 - 2024	1,691

Notes to Combined Financial Statements

December 31, 2014 and 2013

In January 2015, Health Plans and Hospitals modified postretirement health care benefits for certain union represented employees. Under the terms of the agreement, cost sharing will increase for plan participants and future employer-paid monthly premiums will be fixed. The impact of the agreement will result in a negative plan amendment and a reduction in 2015 liabilities of \$477 million.

## (b) Multi-Employer Plans

Health Plans and Hospitals participate in multi-employer union-administered retiree medical health and welfare plans that provide benefits to some union employees. Benefits for retirees under these plans are negotiated as part of the collective bargaining process. For the years ended December 31, 2014 and 2013, Health Plans' and Hospitals' employer expense for both current and retiree benefits was \$73 million and \$68 million, respectively.

## (14) Physicians' Retirement Plan

Kaiser Foundation Health Plan, Inc. provides defined retirement benefits for physicians associated with certain Medical Groups. Benefits are determined based on the length of service and level of compensation of each participant. The plan is unfunded and is not subject to the Employee Retirement Income Security Act.

Notes to Combined Financial Statements

December 31, 2014 and 2013

At December 31, the accrued liability for physicians' retirement plan was as follows (in millions):

		2014		2013
Change in projected benefit obligation: Physicians' retirement plan liability at January 1 Service cost Interest cost Net actuarial loss (gain) Benefits paid	\$	4,522 231 231 1,236 (142)	\$	4,724 269 210 (552) (129)
Physicians' retirement plan liability at December 31	\$	6,078	\$	4,522
Accumulated benefit obligation at end of year	\$	4,565	\$	3,419
Change in plan assets: Fair value of plan assets at the beginning of year Company contributions Benefits paid	\$	 (142)	\$	 (129)
Fair value of plan assets at end of year	\$		\$	
Funded status	\$	(6,078)	\$	(4,522)
Amounts recognized in the balance sheet consist of: Noncurrent assets Current liabilities Noncurrent liability	\$ 	(155) (5,923) (6,078)	\$ 	(143) (4,379) (4,522)
Amounts recognized in net worth: Net actuarial loss	* \$	2,073	= <sup>•</sup> == = <sup>\$</sup> ==	859

The measurement date used to determine physicians' retirement valuation was December 31.

A portion of the investments of Health Plans has been designated by management for the liabilities of the physicians' retirement plan. These investments are not held in trust or otherwise legally segregated and are not restricted even though it has been intended that these assets be used to pay the obligations of the physicians' retirement plan.

For purposes of the physicians' retirement plan expense, the expected return on assets is the portion of investment income that represents the expected return on the investments designated for the physicians' retirement plan. This amount is recorded as a reduction in the expense for the physicians' retirement plan and is excluded from investment income - net, as described below and in the *Summary of Significant Accounting Policies - Investments* note.

Notes to Combined Financial Statements

December 31, 2014 and 2013

For the years ended December 31, physicians' retirement plan provision was as follows (in millions):

	 2014	 2013
Service cost Interest cost Amortization of net actuarial loss	\$ 231 231 22	\$ 269 210 66
Total benefit expense	484	545
Expected return on assets - investment income included in operating expenses	 (318)	 (355)
Net benefit expense	 166	 190
Other changes in projected benefit obligations recognized in net worth Net actuarial loss (gain)	1,236	(552)
Amortization of net actuarial loss	 (22)	 (66)
Total recognized in net worth	 1,214	 (618)
Total recognized in net periodic benefit cost and net worth	\$ 1,380	\$ (428)

During 2015, \$91 million in estimated net actuarial loss will be amortized from net worth into net benefit expense.

Actuarial assumptions used were as follows:

-	2014	2013
Weighted average discount rate at January 1 for		
calculating benefit expense	5.25%	4.45%
Weighted average discount rate for calculating		
December 31 benefit obligation	4.30%	5.25%
Weighted average salary scale for calculating pension		
expense and December 31 benefit obligation	4.40%	4.90%
Expected long-term rate of return on designated investments for		
calculating benefit expense	7.25%	7.50%

Notes to Combined Financial Statements

December 31, 2014 and 2013

The following benefit payments, which reflect expected future service, are expected to be paid (in millions):

2015	\$ 155
2016	171
2017	189
2018	208
2019	225
2020 - 2024	1,370

#### (15) Commitments and Contingencies

#### (a) Lease and Purchase Commitments

Health Plans and Hospitals lease primarily office space, medical facilities, and equipment under various leases that expire through 2048. Certain leases contain rent escalation clauses and renewal options for additional periods.

At December 31, 2014, minimum commitments under noncancelable leases extending beyond one year were as follows (in millions):

2015	\$	315
2016		291
2017		215
2018		146
2019		102
Thereafter	_	376
Total	\$	1,445

Minimum payments above have not been reduced by minimum sublease rentals of \$4 million due in the future under noncancelable subleases.

For the years ended December 31, 2014 and 2013, total lease expense for all leases was \$430 million and \$432 million, respectively.

Health Plans and Hospitals have entered into long-term agreements that require certain minimum purchases of goods and services. These commitments are at levels that are consistent with normal business requirements. Health Plans has committed to directing most of its purchasing volume for selected products through an outside agency and has committed to at least \$1 billion in purchasing per annum through March 31, 2017. During 2014 and 2013, Health Plans' total purchases through this outside agency exceeded \$1 billion. Should the \$1 billion level not be achieved, financial penalties would be assessed at an established percentage of any shortfalls. In addition, should the purchasing volume for certain product categories be redirected from the outside agency, a financial penalty would

Notes to Combined Financial Statements

December 31, 2014 and 2013

be assessed at an established percentage. In management's judgment, there is a remote probability of material financial penalties under this contract.

At December 31, 2014, minimum purchase commitments, excluding contracts that count towards the \$1 billion per annum commitment noted above, extending beyond one year were as follows (in millions):

2015	\$	157
2016		161
2017		90
2018		31
2019		27
Thereafter	_	23
Total	\$	489

During 2014 and 2013, Health Plans' and Hospitals' total purchases under contracts with minimum purchase commitments, excluding those purchases which count towards the \$1 billion per annum commitment noted above, were \$330 million and \$271 million, respectively.

#### (b) Renewable Energy Contracts

In December 2014, Hospitals signed 20 year renewable energy contracts in which Hospitals will record net settlements and realize renewable energy credits from the production of energy from wind and solar sites. The start dates of the wind and solar sites are anticipated to be no later than December 31, 2016 and 2017, respectively. Management cannot estimate the financial impact at this time. In addition, Health Plans and Hospitals have entered into multiple on-site renewable energy contracts ranging between 10 and 20 years that are recorded as either contingent operating leases or purchase agreements.

#### (c) Surety Instruments and Standby Letters of Credit

In the normal course of business, Health Plans and Hospitals contract to perform certain financial obligations that require a guarantee from a third party. This guarantee creates a contingent liability to the entity that provides that guarantee. At December 31, 2014 and 2013, Health Plans and Hospitals had entered into surety instruments and standby letters of credit that totaled \$125 million and \$89 million, respectively.

Health Plan, Inc. and Hospitals also guarantee payment of workers' compensation liabilities of certain Medical Groups under self-insurance programs. The majority of such liabilities are recorded as other long-term liabilities of Health Plan, Inc., as payment is provided for under the applicable medical service agreements. In addition to amounts accrued, at December 31, 2014 and 2013, pursuant to such guarantees, Health Plan, Inc. and Hospitals are contingently liable for approximately \$180 million and \$170 million, respectively, of certain Medical Groups' self-insured workers' compensation liabilities.

Notes to Combined Financial Statements

December 31, 2014 and 2013

## (d) Regulatory

Health Plans are required to periodically file financial statements with regulatory agencies in accordance with statutory accounting and reporting practices. Health Plans must comply with the various states' minimum regulatory net worth requirements generally under the regulation of the California Department of Managed Health Care and various state departments of insurance. Such requirements are generally based on tangible net equity or risk-based capital, and for California are calculated on the basis of combined net worth of Health Plans and Hospitals. At December 31, 2014 and 2013, the regulatory net worth, so defined, exceeded the aggregate regulatory minimum requirements by approximately \$19 billion and \$22 billion, respectively.

Health Plans' regulated subsidiaries maintain investments in various states where they are licensed. At December 31, 2014 and 2013, \$5 million and \$4 million, respectively, in securities were held to satisfy various state regulatory requirements.

Health Plans and Hospitals are subject to numerous and complex laws and regulations of federal, state, and local governments, and accreditation requirements. Compliance with such laws, regulations, and accreditation requirements can be subject to retrospective review and interpretation, as well as regulatory actions. These laws and regulations include, but are not necessarily limited to, requirements of tax exemption, government reimbursement, government program participation, privacy and security, false claims, anti-kickback, accreditation, healthcare reform, controlled substances, facilities, and professional licensure. In recent years, government activity has increased with respect to compliance and enforcement actions.

In the ordinary course of our business operations, Health Plans and Hospitals are subject to periodic reviews, investigations, and audits by various federal, state, and local regulatory agencies and accreditation agencies, including, without limitation, CMS, Department of Managed Health Care, Office of Personnel Management, Occupational Safety and Health Administration, Drug Enforcement Administration, State Boards of Pharmacy, Food and Drug Administration, IRS, National Committee for Quality Assurance, and state departments of insurance.

Health Plans' and Hospitals' compliance with the wide variety of rules and regulations and accreditation requirements applicable to their business may result in certain remediation activities and regulatory fines and penalties, which could be substantial. Where appropriate, reserves have been established for such sanctions. While management believes these reserves are adequate, the outcome of legal and regulatory matters is inherently uncertain, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect on the combined financial position or results of operations.

Notes to Combined Financial Statements

December 31, 2014 and 2013

#### (e) Litigation

Health Plans and Hospitals are involved in lawsuits and various governmental investigations, audits, reviews, and administrative proceedings arising, for the most part, in the ordinary course of business operations. Lawsuits have been brought under a wide range of laws and include, but are not limited to, business disputes, employment and retaliation claims, claims alleging professional liability, improper disclosure of personal information, labor disputes, administrative regulations, the False Claims Act, information privacy and HIPAA laws, mental health parity laws, and consumer protection laws. In addition, Health Plans indemnifies the Medical Groups against various claims, including professional liability claims.

Health Plans and Hospitals record reserves for legal proceedings and regulatory matters where available information indicates that at the date of the combined financial statements a loss is probable and the amount can be reasonably estimated. While such reserves reflect management's best estimate of the probable loss for such matters, Health Plans' and Hospitals' recorded amounts may differ materially from the actual amount of any such losses.

In the opinion of management, based upon current facts and circumstances, the resolution of these matters is not expected to have a material adverse effect on the combined financial position or combined results of operations of Health Plans and Hospitals. The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect.
